

## STANDARD CATALOG OF FORD

**1982 COUGAR XR-7 –SIX / V-6 / V-8** No longer available on this year's personal-luxury XR-7 was the 302 cu. in. V-8 engine. Three choices were offered, though: base 200 cu. in. (3.3-liter) inline six, new optional aluminum-head 232 cu. in. (3.8-liter) V-6, and 255 cu. in. (4.2-liter) V-8. The two-door hardtop body came in GS and upscale LS form, as the former base model dropped out. Gas tanks grew from 18 to 21 gallons. Four-speed automatic overdrive transmission was standard with the V-6 or V-8, while the base inline six had Select-Shift three-speed automatic with a lockup torque converter clutch. Looking at appearance changes, black vinyl-insert bodyside moldings replaced the former color-keyed moldings. Black bumper stripes with white accent stripes replaced bright rub strips. A new half-vinyl roof design with wide black accent and wrap-over molding arrived this year. That molding blended into the door belt moldings to give a unified look. The analog clock was now quartz-type. New options included a Trip-minder computer. XR-7 GS had a vertical-bar grille with bright surround molding, color-keyed soft bumper covering with black rub strips (including white accent stripes), quad rectangular halogen headlamps, amber wraparound park/signal lamps, hood/decklid accent stripes, and upper bodyside paint stripe. Large vertical-theme taillamps had integral backup lenses. Twin Comfort lounge seats had fold-down center armrests and dual recliners. Power brakes and variable-ratio rack-and-pinion steering were standard. Also standard: AM radio, halogen headlamps, and P195/75R14 SBR whitewalls. LS added dual bright remote window-frame-mounted mirrors and luxury wheel covers, plus power windows and tinted glass.
